November 2024 School Bond Facility Projects Every School, Every Student

It is the vision of the North Kingstown School Department to keep two middle schools in our town. Our plan is to build a new Wickford Middle School to replace the old 1932 building. The new Wickford Middle School will be built where the athletic fields are currently. Once the new school has been built, new athletic fields will be laid out where the current school is located. For Davisville Middle School, we have identified a number of specific renovations over the next 5 years to improve that educational facility. In addition, our elementary schools will receive much-needed renovations.

Proposed School Bond Capital Improvement Projects

As we continue to strive for excellence in education, it is essential that we also ensure our facilities reflect our commitment to creating a safe, innovative, and effective learning environment for all students.

Our schools play a vital role in shaping the future of our children and our community. We are fortunate to have dedicated educators, engaged families, and talented students who contribute to the success of our district. However, as we look ahead, we must also address the significant challenges posed by the aging facilities and infrastructure in North Kingstown.

Many of our buildings are decades old and, while they have served us well, they require substantial upgrades to continue providing safe, effective learning environments for our students. The wear and tear over time, combined with new educational demands, mean that we can no longer delay essential improvements.

It is the vision of the North Kingstown School Department **to keep two middle schools in our town**. The plan is to build a new Wickford Middle School on the current property of the school. The new school will be built where the current athletic fields are. Once the new school is built new fields will be laid out where the current school is located. We have identified specific renovations for Davisville Middle School over the next 5 years. Each Elementary School will also receive renovations with the proposed School Bond. **The School Bond in the amount of \$137,200,000 is on the ballot for this November's election.**

These capital improvement projects are not just about maintaining our buildings; they are about ensuring that every child in our district has the opportunity to learn in a safe, supportive, and inspiring environment. Quality facilities are a critical component of educational success, and they reflect our community's commitment to the future.

Your voices are important to us. We value your participation in shaping the future of our district. You can use the [link below](#) to forward any questions you have. We will compile answers into our FAQ.
